

Senior Full Stack Web Engineer at IGNITE by FORVIA HELLA w/m/d

all-remote, global

Join the Future of Software – with IGNITE by FORVIA HELLA

We are looking for tech visionaries who want to rethink software development.

Are you ready to shape the next generation of mobility?

Do you have a passion for technology and a desire to work on groundbreaking projects?

Then IGNITE by FORVIA HELLA is the place for you!

We are an agile team that develops and distributes software solutions. Our core competence lies in the development of software products that are directly integrated into vehicle systems or that are usable in the development environment of industrial sectors. But we go even further: with the latest technologies such as machine learning and cloud computing, we take our software products to the next level, creating solutions that go beyond traditional approaches. Sounds exciting? Keep reading!

What you can look forward to

→ **Entrepreneurial Ownership:** At Ignite, you won't just execute tasks – you'll shape products, influence direction, and leave your mark. If you love taking ideas from zero to one, you'll feel right at home.

→ **Work That Energizes You:** There's no routine at Ignite. If you love tackling real engineering challenges and enjoy pushing boundaries for no-so-straightforward problems and advanced technologies, this is your playground.

→ **Cutting-Edge Technologies:** AI, machine learning, LLMs, and cloud-native approaches form the backbone of everything we build. You'll experiment, prototype, and ship solutions that meaningfully impact the future of vehicle and industrial tech.

→ **Flexibility:** Collaborate across continents and shape a schedule that supports your productivity and lifestyle., fully remote.

Senior Full Stack Web Engineer at IGNITE by FORVIA HELLA w/m/d

What you should bring

- **A Builder Mindset:** You don't wait for instructions — you seek opportunities, propose solutions, and make things happen.
- **Curiosity and Drive:** You love technology not as a spectator but as a creator. You push yourself, learn fast, and bring tangible outcomes.
- **Proactive Responsibility:** You take ownership end-to-end, follow through on challenges, and deliver high-quality results without needing constant direction.
- **Team-First Energy:** You collaborate with enthusiasm, elevate those around you, and contribute to a culture of excellence and momentum.

What awaits you

- You will own the full web stack — from a polished, high-performance frontend to a reliable, scalable backend. You'll architect and implement the systems that power our core product experience.
 - Whether it's frontend or backend stacks, you'll have the freedom to choose the right technologies and push for excellence.
 - You will design and maintain robust backend services that are secure, efficient, and built for scale — including API design, business logic, integrations, and data workflows.
 - You will work hands-on with databases (SQL/NoSQL), modeling clean schemas, writing efficient queries, and ensuring data integrity and performance.
 - You will deploy and run your code in the cloud (AWS, Azure), ensuring reliability, observability, and performance. You'll leverage existing CI/CD pipelines to ship high-quality code frequently — and confidently.
-

Senior Full Stack Web Engineer at IGNITE by FORVIA HELLA w/m/d

all-remote, global

- You will write clean, maintainable, well-tested code, raising the bar for engineering quality. You care about the details, from architecture to variable naming to user experience.
- You will collaborate closely with product, AI/ML, and domain experts to turn ideas into real, elegant features that delight users and push our product forward rapidly.
- You will be a guardian of technical excellence, reviewing code, shaping best practices, and ensuring that our systems remain fast, modern, and reliable as we scale.
- As Ignite we fully support and are aligned with the use of AI in our day-to-day tasks. You will be encouraged to use the newest AI coding tools at your disposal.

Can't identify with this role? No problem, convince us of your skills and personality, and get in touch.
